## PROFILE

I'm a self-taught web engineer with over five years of experience building & maintaining software, websites, interfaces, & products. I am passionate about the full-stack of software from User to Infrastructure and back again, e.g. documentation. I have worked on both private code and many open-source projects.

## EXPERIENCE

INNOVATION SPECIALIST, GSA / TTS / 18F; WASHINGTON DC – 2015 – PRESENT

Full-stack software engineer maintaining federal open source projects such as *cloud.gov*, *vote.gov*, *standards.usa.gov*, and more . Working remotely with a nearly 70% distributed team. Engineering chapter Facilitator between engineering director, supervisors and fellow engineers working with five cohorts.

FRONT-END ENGINEER, CO+LAB MULTIMEDIA; RICHMOND, VA – 2015 – 2015

Optimizing front-end workflows & deployments on a team of seven developers. Building WordPress themes & customized installations. Extending the core functionality of WordPress by creating custom-APIs for bidirectional communications between the client and server.

SOFTWARE ENGINEER, CONDÉ NAST; NEW YORK, NY – 2013 – 2015

Building & maintaining a client-rendered video streaming website along with nine other engineers. Practicing SCRUM along with continuous integration & daily deployments to production. Worked closely with the vice president of product design & engineering. Working in a completely Rails 4 development environment. Working remotely four to five times per month.

SENIOR DEVELOPER, ROKKAN; NEW YORK, NY – 2011 – 2013

Worked collaboratively with UI & UX designers to create and integrate templates for various clients. Involved in client & internal meetings. Lead developer on projects. Gave talks & trained coworkers on Git.

## SKILLS

Front-end (HTML, CSS, JS), Popular MV\* frameworks, Ruby, Python, Go, Rust, [No]SQL, TTD, Agile, Automation, Linux, SCM, CI/CD, Release Management
