## PROFILE

I'm a self-taught web engineer with over seven years of experience building & maintaining software, websites, interfaces, & products. I am passionate about the full-stack of software from User to Infrastructure and back again, e.g. documentation. I have worked on both private projects and numerous open-source projects.

## EXPERIENCE

LEAD INNOVATION SPECIALIST, GSA / TTS / 18F; WASHINGTON DC (REMOTE) – 2015 – PRESENT

Full-stack software engineer maintaining Federal open-source projects such as *cloud.gov*, *vote.gov*, *standards.usa.gov*, and more . Working remotely with a nearly 80% distributed team. Engineering chapter Facilitator between engineering director, supervisors, and fellow engineers working with five cohorts. Gained valuable experience around compliance and security as well.

SOFTWARE ENGINEER, ALEXANDER INTERACTIVE; NEW YORK, NY (REMOTE) – 2015 – 2015

Brought on as a contractor to work on multiple projects for several months in order for the team to accomplish their deliverables on time. Worked closely with project managers, junior and senior engineers, and clients.

FRONT-END ENGINEER, CO+LAB MULTIMEDIA; RICHMOND, VA – 2015 – 2015

Optimizing front-end workflows & deployments on a team of seven developers. Building WordPress themes & customized installations. Extending the core functionality of WordPress by creating custom-APIs for bidirectional communications between the client and server.

SOFTWARE ENGINEER, CONDÉ NAST; NEW YORK, NY – 2013 – 2015

Building & maintaining a client-rendered video streaming website along with nine other engineers. Practicing SCRUM along with continuous integration & daily deployments to production. Worked closely with the vice president of product design & engineering. Working in a completely Rails 4 development environment. Working remotely four to five times per month.
